

Fees for Consultations, Care Coordination, and Additional Clinical Services

At Guerin Therapy Group, we recognize that effective treatment sometimes involves clinical work outside of scheduled therapy sessions. This may include communication with other treatment providers, care coordination, extensive documentation, and special requests that require additional clinician time.

Fee: \$40 per 15 minutes of eligible services.

The following services may incur an additional fee:

- **Clinical consultations:** Extended phone or virtual consultations with a client's dietitian, physician, psychiatrist, or other treatment provider.
- **Care coordination:** Clinical collaboration with other members of a client's treatment team, including coordination related to eating disorder treatment and recovery.
- **Extensive documentation:** Preparation of detailed reports, summaries, forms, or other documentation beyond routine clinical documentation.
- **Special requests:** Additional clinical work requested by a client or authorized representative that falls outside the scope of routine treatment services.

Billing increments: Fees are calculated by rounding up to the next 15-minute increment. Each 15-minute increment is billed at \$40. For example, services lasting 1–15 minutes cost \$40, 16–30 minutes cost \$80, 31–45 minutes cost \$120, and 46–60 minutes cost \$160.

Brief communications and routine administrative activities may be included in the cost of treatment and will not automatically incur an additional fee. When a service may result in an additional charge, we will communicate the anticipated fee in advance whenever reasonably possible and obtain the client's agreement before proceeding with non-urgent services.

Additional fees will only be charged when permitted by applicable law, professional requirements, and the terms of the client's insurance plan or provider agreement.

Clients may contact Guerin Therapy Group with questions about whether a requested service may incur an additional fee before the service is provided.
